## Danish Design introduce a new way to BBQ

Danish Design are the largest retailers of Scandinavian furniture on the Costa Blanca.

The style and the quality of the furniture and accessories available at Danish Design are quite simply, staggering. Interior furniture ranges from real leather, solid wood, reinforced glass, stainless steel and quality marble.

Living rooms, dining rooms, bedrooms, children's furniture, complete office ranges and all types of outdoor furniture and accessories.

It is one such outdoor accessory that really does deserve a mention....

The new Cobb portable Barbeque – "Your kitchen in a bag", which allows you to cook anything, anywhere and at anytime.

This amazing invention allows you to cook indoors, outdoors, on a boat, on the beach, even on the smallest balcony.

It is lightweight, compact, easy to use, and whilst internal temperatures reach 280°C, the exterior temperature remains completely cool to the touch.

From breakfast to lunch, from dinner to dessert, the multifunctional Cobb makes cooking easier than ever before.

Barbeque, roast, smoke, fry, bake and boil.

No hassle, no inconvenience, no mess.

And priced at just 155 euros, the pleasure of portable cooking has never been more fun.

Danish Designs is located on Poligono Industrial Casa Grande, Torrevieja.

For more information call Danish Design on 965 070 114. Open Monday to Friday 10am until 7pm and Saturdays from 10am until 3pm.

Luxurious and spacious interiors in a motor-boat.

## Euro Nautica

EURO NAUTICA CALPE S.L. has the pleasure to launch the European unveiling of their new range of Larson 'Day Cruiser' motor-boats at the Salon Nautico De Barcelona from November 8th to 16th 2008.

The interiors have been utilised to the maximum to create a unique space combining the bow cabin with the lounge. As a result, a luxurious lounge has been created - usually more common in longer ships - combined with the installation of a TV, DVD and a high-spec music system. One can spend hours in luxury, then in a matter of minutes have two double beds at your disposition. The floor of the cabin and bath-tub are Teca imitations which accentuates even more the open space available.

Experience shows that in the hottest summer days as well as the colder days, the

cabin gets more use, but vessels of this length, tend to offer limited space.

In April both models, the 330 Day Cruiser and the 370 Day Cruisers were presented in the United States where they were very well received.

Both models remain available in their usual versions and with very competitive prices, as is the case with all the models in the Larson range.

The Larson 370 Day Cruiser will be exhibited at the Salon Nautico De Barcelona installed with the following optional extras: Rigid roof, I.P.S. Diesel Volvo Penta motors, assembled and tested by the engineers from Volvo Penta in Little Falls. Using the I.P.S.'s joystick, the docking manoeuvres become child play.

We invite you to visit us at our stands at the exhibitions, for more information contact our central office in Calpe.

## The Sat and PC Guy

THE Sat and PC Guy installs and maintains satellite television services on the Costa Blanca North – Calpe to Valencia and inland to Alcoy and Ontinyente. We are able to supply and install a variety of dishes, from 80cm to 2.4 meter dishes, and digital satellite receivers, from Sky Digiboxes and the award winning Sky+ Digital Recorder, to Freesat, High Definition and generic receivers.

I was recently asked this question: "Is Freeview the same as Freesat?"

### FREEVIEW

"Freeview" is the brand name of a UK Digital TV service only available in the UK and not in Spain. It is received via traditional TV aerials and is only transmitted from TV transmitters in the UK.

Spain has its own version of "Freeview" called Television Digital Terrestrial (TDT). There are approximately 30 channels available, and on many channels you can change the audio into an alternative language – like English. You will need a TDT "set top box" or a TV with TDT built in. (see [www.tdt.es](http://www.tdt.es))

### FREESAT

Freesat, a satellite version of Freeview, was launched in May 2008. Using an official Freesat receiver, you can watch about 100 free satellite TV channels. BBC, ITV and C4 are all free to watch on satellite.

### FREESATFROMSKY

Reception on some channels may depend on the dish size.

Freesatfromsky uses official Sky receivers and allows the viewing of many more free channels than Freesat. With a "Freesatfromsky" viewing card you can receive the FTA channels and Five, Five US and Fiver, Sky Three, Setanta Sports News. Please note that that reception of certain channels will depend on dish size. A free version of FIVE is expected later this year. Some installers are using generic receivers (sometimes called Free-to-Air receivers) and calling them Freesat receivers. A Sky or Freesat receiver will be able to receive BBC Interactive, Sky Active and a full 7 day programme guide - generic FTA receivers only have now and next programme information.

With the recent issues regarding UK TV, be wary of companies offering BBC and ITV:

On a small dish - these can only be received for free via a minimum of 1.4mdish (some areas 1.8m)for

a monthly subscription - they do not need any form of subscription, they are free to watch on satellite

From other satellites like Hotbird rather than Astra 2 - UK TV is broadcast from one "satellite constellation", the Astra 2 satellites at 28.3 to 28.5 degrees.on systems with only 20 or 64 channels - by satellite you will receive over 100 free TV channels, the BBC have over 15 regional variations on satellite alone.

The signal is direct from the satellite and is a pure digital signal - many people have commented to me on the how good the quality of the picture is on satellite compared to their now defunct rebroadcast system.

Whether you require a satellite system installing, your existing system upgraded or serviced, or more information contact The Sat and PC Guy on 96 281 9796 / 620 130 292 or visit [www.satandpcguy.com](http://www.satandpcguy.com).
